

Shaping health care through innovative and expert nursing leadership

### About AONE

The American Organization of Nurse Executives (AONE) is the national organization of nurses who design, facilitate and manage care. With more than 9,500 members, AONE is the leading voice of nursing leadership in health care.

Since 1967, the organization has provided leadership, professional development, advocacy and research to advance nursing practice and patient care, promote nursing leadership excellence and shape public policy for health care. AONE's state affiliations and its alliances with state hospital associations give the organization's initiatives a regional and local presence. AONE is a subsidiary of the American Hospital Association.

AONE is the voice of nursing leadership. AONE convenes and supports nurse leaders in health care to make a positive contribution to the nursing profession and to realize greater success as a nurse leader. AONE is comprised of the diverse talents and experiences of thousands of nurses who are committed to excellence in nursing leadership and patient care delivery. AONE members work in hospitals, academic medical centers, nursing homes, critical care access hospitals and other health care environments.

### Our Mission

To shape health care through innovative and expert nursing leadership

### Our Vision

Global nursing leadership—one voice advancing health

### AONE supports the following core principles:

- A robust and diverse nursing workforce is essential to the health of all Americans.
- Nurses are integral members of the health care team and are critical to achieving the Triple Aim: improving quality of care to individuals, improving the health of communities and simultaneously reducing costs.
- Affordable, accessible, quality health care and improved patient outcomes depend upon patient-centered and comprehensive care provided by interdisciplinary partnerships of physicians, nurses and other health professionals.
- Nursing data is central to improve patient outcomes, quality, safety and the delivery of population-based care.
