

Models of Care

Charter

The AONL Models of Care Coalition is established to lead the transformation of care delivery across healthcare systems by proposing design elements, implementation practices, and evaluation methodology for tomorrow’s models of care. These models will be patient-centered, technology-enabled, and responsive to the evolving needs of communities and healthcare professionals.

AONL Strategic Alignment

Priority

Lead, inspire, and support the health care workforce

Objective

Collaboratively develop and promote adaptable models of care that integrate supportive technologies, optimize workforce capabilities, and anticipate future healthcare challenges.

Eliminating Disparities in Healthcare Outcomes

Innovation: Curiosity and learning from national experts to cultivate best practices across the industry.

Technology: Leverage digital health tools, AI, and data analytics to enhance decision-making, efficiency, and access.

Stakeholders

Key stakeholders include, but are not limited to:

- Diverse AONL members at all levels

Meeting Cadence

Virtual meetings scheduled every month for 2025

- 2nd Friday @ 10 a.m. CT

Deliverables

Deliverable	Target Date
Guiding Principles: Design, implementation & evaluation of future models of care	TBD
