

Models of Care

Charter

The AONL Models of Care Coalition is established to lead the transformation of care delivery across healthcare systems by proposing design elements, implementation practices, and evaluation methodology for tomorrow’s models of care. These models will be patient-centered, technology-enabled, and responsive to the evolving needs of communities and healthcare professionals.

AONL Strategic Alignment

Priority

Lead, inspire, and support the health care workforce

Objective

The PICO Framework: In nurse-led care delivery across healthcare settings (P), how does the development and implementation of contemporary models of care (I) compared to traditional models of care (C) and impact outcomes aligned with the Quintuple Aim: patient experience, population health, cost of care, clinician experience/well-being, and health disparities (O).

Eliminating Disparities in Healthcare Outcomes

Innovation: Curiosity and learning from national experts to cultivate best practices across the industry.

Technology: Leverage digital health tools, AI, and data analytics to enhance decision-making, efficiency, and access.

Stakeholders

Key stakeholders include, but are not limited to:

- AONL members at all levels
- Other professional nursing organizations

Meeting Cadence

2026 virtual meetings are every 2nd Monday @ 1200 CT

- Workstream #1 – monthly
- Workstream #2 – bi-weekly on 2nd Monday at 1000 CT
- Workstream #3 – bi-weekly
- Tri-chair meetings monthly and as needed

Deliverables

Deliverable	Target Date
AONL Conference session	March 2026
Literature review expert opinion article	Summer 2026
Stakeholder interview summary	Fall 2026
Environmental Scan summary	Fall 2026
